

## TESTIMONY OF MAE ARTLIP

In 1978, I was numb (no feeling) from my feet to my hips and my hands to my shoulders. I could not walk a straight line. I always goofed off to cover up the fact I had trouble walking. I went to the Cleveland Clinic for tests and was diagnosed with Multiple Sclerosis (MS). According to the doctors it's an autoimmune disease where the body attacks itself. In MS the myelin is destroyed which is the fatty substance that coats and protects the nerves in the brain and spinal cord. It is like stripping the coating off an electric wire therefore; causing interference of communication of the brain and the rest of the body. According to medical doctors, once this happens it can not reverse or repair itself. **BUT GOD HEALED** me of MS in 1985 after I was prayed for at church. Hallelujah! This was a miracle because **ALL** symptoms left immediately and **I AM STILL HEALED!**

January 1990, my husband Henry was diagnosed with Mono for two years and could not mow lawns or use the snow blower in the winter. I had to do what he could not do. November 1992, the doctor discovered the lab report was incorrect. Henry had cancer of the prostate and it had already gone into his bones. Our family doctor said that because the Lord had healed me of MS I could give my husband 24 hour care from September 1993 to his passing in February 1994.

October 2007, I had cataracts removed from both eyes and the doctors' report found Dry Macula Degeneration and a rare disorder called "Fuchs' Dystrophy." Only 1% of the population has Fuchs' Dystrophy. It affects the cornea of the eye and causes blindness. May 2009, Rev. Mel Novak prayed for me and God is starting to heal me. The first thing God did was heal me of past hurts and then I noticed my eyes began to focus. Now, I can see things I could not see before and my sight is gradually improving. Everyday, I thank God for healing my eyes and giving me 20/20 vision and will continue until it manifests. I love the Lord and trust in Him for my healing! I know He is faithful and healing is a process that takes time and a miracle is instantly. **I BELIEVE GOD IS HEALING ME!** Oh, I pray God's Arsenal that Mel gave to me **DAILY**. There is tremendous power in prayer. The Holy Spirit keeps me young. Mel said, "you ain't old till you're cold."
